

Team Members & Skill Set

Project: E-Commerce Web Application

The following document lists all team members assigned to this project, their designated roles, and their technical skill sets. Task assignment must strictly use ONLY the names listed below.

Name	Role	Skills
Uvuv	Backend Developer	Python, Node.js, REST APIs, FastAPI, Django
Aryan Saxena	Frontend Developer	React.js, HTML, CSS, JavaScript, Tailwind
Abhishek Rajput	Database Administrator	PostgreSQL, MySQL, MongoDB, Query Optimization
Uvuv V	QA / Tester	Manual Testing, Selenium, Postman, Test Plans

Role Definitions

Uvuv — Backend Developer

Responsible for all server-side logic, REST API development, authentication systems, and payment gateway integration. Works with Python/FastAPI or Node.js.

Aryan Saxena — Frontend Developer

Responsible for all UI screens, React components, responsive design, and connecting frontend to backend APIs.

Abhishek Rajput — Database Administrator

Responsible for schema design, writing and optimizing SQL/NoSQL queries, setting up migrations, backups, and ensuring data integrity.

Uvuv V — QA / Tester

Responsible for writing test cases, executing manual and automated tests, API testing via Postman, and regression testing before releases.

IMPORTANT: Any task assignment must use ONLY the exact names listed in the table above. Do not invent, abbreviate, or modify any team member name.
